

✧ Industry, Academia, and Government Cooperation

Government (METI)

- Development of Aerospace industry, ensuring superiority in Japan of highly-efficient(including energy consumption) manufacturing technology
- New industry-university-government cooperation, building a scheme of collaboration with companies
- Gathering information for new R&D Policy

Aerospace Industries

- Effective solution of tasks
- Discover new themes
- Maintaining and improving international competitiveness

University

- Strengthen system of basic research for manufacturing technology
- Immediately apply research achievements in the real world

Recognize common tasks of aerospace industries

Access to Domestic cutting-edge research

Apply accomplishments of international joint development

Expand market share in highly competitive aircrafts
